How to read the screenshots

Orange numbered circles point to parts of the screen. The list under each screenshot explains them in the same order.

About the sample content

The screenshots show sample articles, authors and a sample journal name. Your website shows your own journal, articles and people in the same places.

01

CHAPTER 01

Your website at a glance

Your journal website is built on Open Journal Systems (OJS) 3.5, the software used by tens of thousands of scholarly journals. It has been given its own design, a simpler admin panel, clickable references, author pages and readership statistics with a world map.

What the website does

FEATURE	WHAT IT MEANS FOR YOU
Online submission	Authors register and send manuscripts through a guided form. You receive them in the admin panel.
Peer review	Double-anonymous review with invitations, deadlines and automatic reminders to reviewers. A reviewer who declines tells you why and can suggest someone else.
Issues and archive	Articles are published in issues (volume, number, year) with a cover. All past issues stay in the archive.
PDF and HTML full text	Every article has a PDF that opens in the browser. Optionally, the full text can also be shown on the article page.
Clickable references	Citations such as [1] or (Smith, 2020) link to the reference list and show the reference when the reader points at them.
Author pages	Every published author gets a public page with photo, affiliation, ORCID, biography and articles.
Identifiers and indexing	DOIs through Crossref, ORCID iDs, Google Scholar metadata and OAI-PMH, which indexing services use to harvest your articles.
Readership statistics	Views, downloads and readers by country on a world map, the most-read articles, and how many people are on the site right now. The map can also appear on the home page.
Email notifications	Authors, reviewers and editors receive emails automatically at each step.

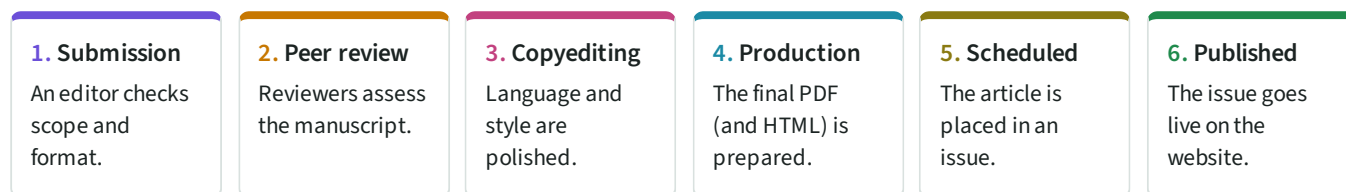

Who does what

ROLE	WHAT THEY CAN DO
Administrator (you)	Everything, including site-wide settings. This is the account on the cover.
Journal manager	All submissions, issues, settings, users and statistics of the journal.
Journal editor	The editor-in-chief: all submissions and editorial decisions.

Section editor	Only the submissions assigned to them.
Reviewer	Their review invitations and review forms.
Author	Their own submissions, messages from the editors and their public profile.
Reader	Anyone can read and download articles without an account.

How an article gets published

Every article passes through the same six steps. You will see these colours throughout the admin panel.

Authors submit; editors publish. An article only appears on the website after an editor publishes the issue it belongs to.

02 CHAPTER 02 Signing in and the Home page

Everything you manage happens in the admin panel. You reach it by signing in on the website.

Sign in

- 1 Open <https://raazpublishnp.com> and click **Login** at the top right.
- 2 Enter your username and password (see the cover) and click **Login**.
- 3 You arrive on the **Home** page of the admin panel.

HOME / LOGIN

Login

Required fields are marked with an asterisk: *

1 Username or Email *

2 Password *

Forgot your password? 4

☒ Keep me logged in

3 LOGIN Register

- 1 Username (or your email address).
- 2 Password.
- 3 The **Login** button.
- 4 **Forgot your password?** sends a reset link to your email.

Getting back to the admin panel

When you are on the public website and signed in, open your username at the top right and choose **Dashboard**. The admin panel also works on a phone; the menu then sits above the page.

The Home page

Home shows what needs your attention today. Every number is a link that opens the matching list of submissions.

The screenshot displays the 'Demo Journal of Animal Science' home page. A dark teal header contains the site name, a 'View website' button (callout 7), and user icons. A left sidebar lists navigation options: Home, Submissions, Issues, Announcements, DOIs, Settings, Statistics, Tools, and Administration. The main content area is titled 'Good evening, Admin' and 'Here is what is happening at Demo Journal of Animal Science today.' (callout 1). A 'Needs your attention' section (callout 2) features four cards: 'New submissions' (2), 'Ready for a decision' (0), 'Revisions received' (0), and 'Overdue reviews' (0). Below this is the 'Publishing pipeline' (callout 3) showing six stages: Submission (1), Peer review (1), Copyediting (1), Production (1), Scheduled (0), and Published (8). The 'Recent submissions' section (callout 4) lists four articles with their status: Submitted, In review, Copyediting, and Production. The 'Current issue' section (callout 5) shows 'Vol. 1 No. 2 (2026)' with 4 articles. A 'Declined review requests' section shows one request. A 'Shortcuts' section (callout 6) lists quick actions like 'New submission' and 'Create or publish an issue'. A '+ New submission' button is located in the top right (callout 8).

1 TUESDAY, 6 OCTOBER 2026

Good evening, Admin

Here is what is happening at Demo Journal of Animal Science today.

2 Needs your attention

Icon	Count	Category	Description
	2	New submissions	Waiting for an editor to be assigned
	0	Ready for a decision	Reviews are in: accept, revise or decline
	0	Revisions received	Authors have sent revised files
	0	Overdue reviews	Reviewers are past their due date

3 Publishing pipeline

Every article moves through these steps. Select a step to see the submissions in it.

Step	Count	Category	Description
1 Submission	1	Submission	Editor checks scope and format.
2 Peer review	1	Peer review	Anonymous reviewers assess it.
3 Copyediting	1	Copyediting	Language and style are polished.
4 Production	1	Production	PDF and HTML galleys are prepared.
5 Scheduled	0	Scheduled	Placed in an upcoming issue.
6 Published	8	Published	Live on the website.

3 Abstract

Background: Rising ambient temperatures threaten the productivity and welfare of high-yielding dairy cows.

Methods: Sixteen multiparous Holstein cows were enrolled in a randomized crossover design with two 21-day periods: thermoneutral (temperature–humidity index, THI < 68) and heat stress (THI 78–82). Rumen fluid, milk yield and composition, and physiological variables were measured.

Results: Heat stress reduced dry matter intake by 12% and milk yield by 3.9 kg/day ($P < 0.01$). Total volatile fatty acid concentration decreased while ruminal pH and the acetate-to-propionate ratio increased.

Conclusions: Heat stress impairs rumen fermentation independently of intake, supporting nutritional strategies that

- 1 Ready-made lists with counts: *Needs editor*, *Awaiting reviews*, *Reviews overdue*, each stage, *Published* and more.
- 2 **Filters**: by section, assigned editor, issue or days since last activity.
- 3 Search by title, author or ID.
- 4 **Assign Editor** gives the submission to an editor.
- 5 **View** opens the submission.

Checking a new submission

The screenshot displays the 'WORKFLOW: SUBMISSION' interface. On the left, a sidebar menu (1) lists various stages: Workflow, Submission, Review, Copyediting, Production, and Publication. The main area shows the submission details for 'Mitchell et al.'. Under 'Submission Files', a table lists a file named 'manuscript-101.pdf' (2) uploaded on 2026-09-25. To the right, action buttons are visible: 'Send for Review' (3), 'Accept and Skip Review', and 'Decline Submission' (4). Below these, the 'PARTICIPANTS' section shows Sarah Mitchell as the author, with an 'Assign' button (5) next to her name.

- 1 The submission's menu. **Workflow** holds the steps (Submission, Review, Copyediting, Production); **Publication** holds the article details (title and abstract, contributors, metadata, references, galley, issue).
- 2 The files the author uploaded. Click a file to download it.
- 3 **Send for Review** moves it to peer review (chapter 5).
- 4 **Decline Submission** if it is out of scope. The author is notified by email.
- 5 **Assign** adds an editor (or other participant) to this submission.

- 1 Open the submission from **New submissions** on Home or from **Submissions > Needs editor**.
- 2 Under **Participants**, click **Assign** and choose the handling editor.
- 3 Check the manuscript against the journal's scope and author guidelines. Make sure the author's name is not inside the manuscript file, because review is anonymous.
- 4 Click **Send for Review**, **Accept and Skip Review** (for editorials, for example) or **Decline Submission**.

Discussions

Use **Add discussion** on any stage to message the author or other participants. Messages are sent by email and kept with the submission.

05

CHAPTER 05 Peer review

Reviewers are invited by email, respond online and submit their review through a form. You then record a decision.

Recording a decision

Every decision (Send for Review, Accept, Request Revisions, Decline) opens the same kind of page: first an email to the author, then the files to carry forward.

Send for Review: Notify Authors

This submission is ready to be sent for peer review.

1 Notify Authors 2 Select Files

1 Notify Authors

Send an email to the authors to let them know that this submission will be sent for peer review. If possible, give the authors some indication of how long the peer review process might take and when they should expect to hear from the editors again. This email will not be sent until the decision is recorded.

Dear Sarah Mitchell,

I am pleased to inform you that an editor has reviewed your submission, "Early detection of lameness in dairy cows from accelerometer data: a machine-learning approach", and has decided to send it for peer review. An editor will identify qualified reviewers who will provide feedback on your submission.

- 1 The steps of the decision: notify the authors, then select the files.
- 2 The email to the author, pre-written from a template. Edit it freely; it is only sent when you click **Record Decision**.

Anonymous review

Reviewers and authors do not see each other's names. When you share reviews with the author, only the comments meant for the author are included.

REVIEWERS SUGGESTED BY AUTHOR

SA Samir Ahmed
Institute of Animal Science, Eastbrook College ...
Suggested by Helen Carter when declining the review request.

LN Laura Novak
Faculty of Agriculture, Southgate University ...
Suggested by Helen Carter when declining the review request.

- 1 **Add Reviewer:** choose a reviewer or create a new one, set the deadlines and send the invitation.
 - 2 **Request Revisions** asks the author for changes.
 - 3 **Accept Submission** moves it to copyediting.
 - 4 **Decline Submission.**
- 1 Click **Add Reviewer**. Search your reviewers by name or interest, or create a new reviewer account.
 - 2 Check the deadlines. By default reviewers have 7 days to respond and 21 days to complete the review. Reminders are sent automatically.
 - 3 Follow progress in the **Reviewers** panel; you receive an email when a review is submitted.
 - 4 When enough reviews are in, read them and record your decision. If you request revisions, the author uploads a revised file on the same page, and you can start a new review round with **Create New Review Round**.

When a reviewer declines

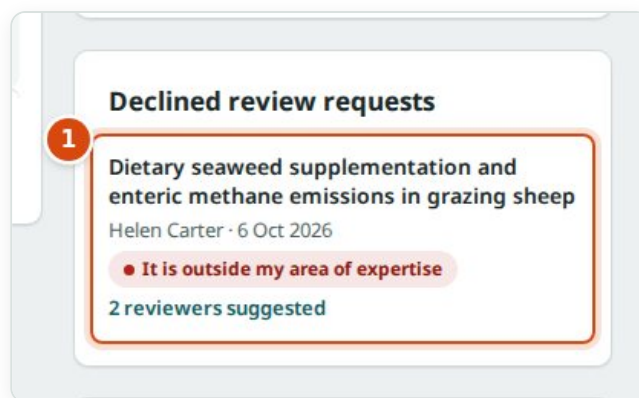

A reviewer who cannot review must tell you why. They can also write to you and suggest up to two other reviewers. This is what they see when they click **Decline Review Request**:

The screenshot shows a web interface for declining a review request. The title is "Decline Review Request". Below the title is a thank-you message: "Thank you for letting us know. Please tell the editor why you are declining; it helps them find another reviewer quickly." The form is divided into five numbered sections:

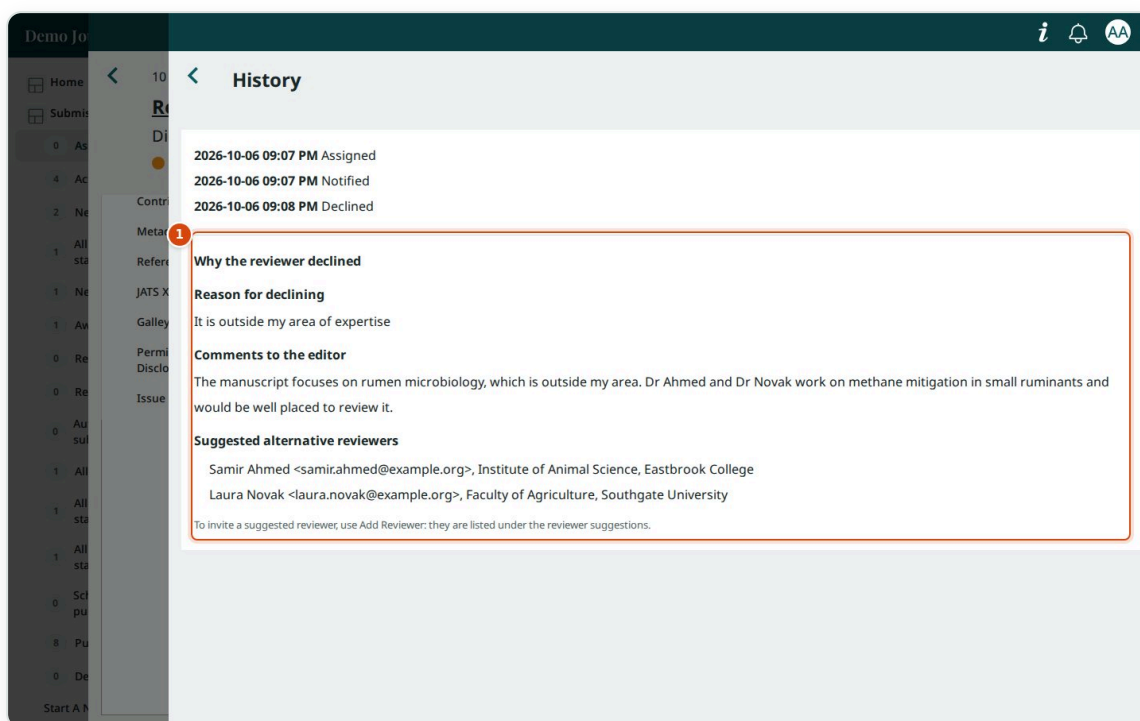

- Reason for declining ***: A section with four radio button options: "I do not have time right now" (with a sub-note: "If you only need more time, please accept the invitation and ask the editor for an extension instead."), "There is a conflict of interest", "It is outside my area of expertise" (which is selected), and "Other".
- Comments to the editor**: A large text area containing the comment: "The study is on rumen microbiology, which is outside my area. Dr Ahmed works on methane in small ruminants and would be a good reviewer."
- Would you like to suggest alternative reviewers?**: A section with a sub-note: "If possible, suggest one or two suitable reviewers. Please do not suggest anyone from the same institution as the authors." It has two radio button options: "Yes" (selected) and "No".
- Reviewer 1**: A section with three input fields: "Full name *" (containing "Samir Ahmed"), "Email *" (containing "samir.ahmed@example.org"), and "Institution" (containing "Institute of Animal Science, Eastbrook College"). Below this is a section for "Reviewer 2" with three empty input fields for "Full name", "Email", and "Institution".
- Decline Review Request**: A button at the bottom right of the form.

- 1 Reason** (required): no time, a conflict of interest, outside their expertise, or another reason they describe. Reviewers who only need more time are asked to accept and request an extension instead.
- 2 Comments to the editor** (optional).
- 3 Suggest alternative reviewers?** Yes or No.
- 4** Up to two people, each with a name, an email address and an institution.
- 5** Sends the decline. You receive the usual "unable to review" email, with the reason, comments and suggestions at the top.

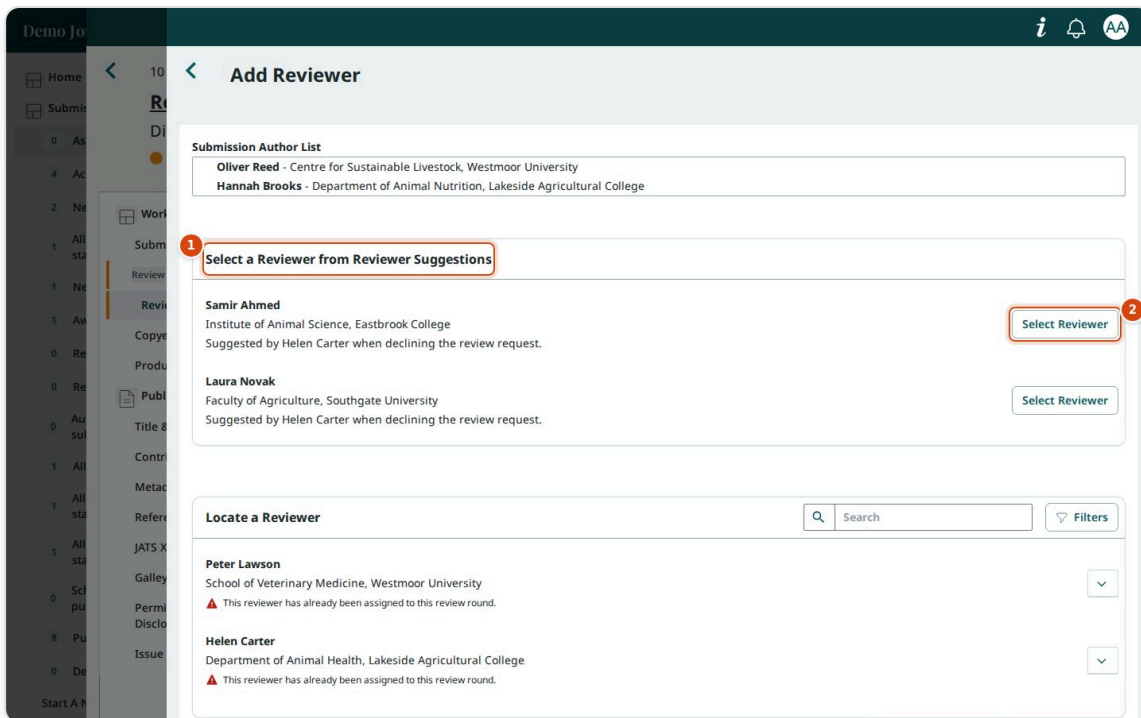

Seeing why, and inviting a suggested reviewer

On **Home**, **Declined review requests** shows each decline from the last 60 days with its reason and how many reviewers were suggested. Click it to open the submission.

- 1 In the submission's **Reviewers** panel, open the reviewer's **⋮** menu > **History** to see the reason, their comments and the people they suggested.

- 1 Click **Add Reviewer**. Suggested people appear at the top, under **Select a Reviewer from Reviewer Suggestions**, with who suggested them.
- 2 **Select Reviewer** creates their reviewer account from the suggestion. You then set the deadlines and send the invitation as usual, with nothing to retype.

Reviewer suggestions setting

Suggestions appear while **Settings > Workflow > Review > Reviewer Suggestions** is on, which it is on your site. With this setting, authors can also suggest reviewers when they submit. You are never obliged to use a suggestion.

06

CHAPTER 06 Copyediting and production

After acceptance, the manuscript is polished and turned into the files readers will see: a PDF and, optionally, an HTML full text.

Copyediting

The screenshot displays the 'Copyediting' workflow in a journal management system. The top navigation bar includes 'Home', 'Submission', and 'Activity Log'. The main content area is titled 'WORKFLOW: COPYEDITING' and shows the current submission language as 'English'. The workflow is divided into three main sections: 'Draft Files', 'Copyediting Discussions', and 'Copyedited Files'. The 'Draft Files' section has an 'Upload/Select Files' button. The 'Copyedited Files' section also has an 'Upload/Select Files' button. The 'Copyediting Discussions' section has an 'Add discussion' button. On the right side, there is a 'PARTICIPANTS' section with an 'Assign' button. A red box highlights the 'Send To Production' button, and a red box highlights the 'Margaret Ellison' participant.

Workflow: Copyediting

Current Submission Language: English

Draft Files
These are files from the review stage which are to be copyedited

Copyedited Files
These are edited files that will be taken to the production stage

Copyediting Discussions

Participants

1 Send To Production

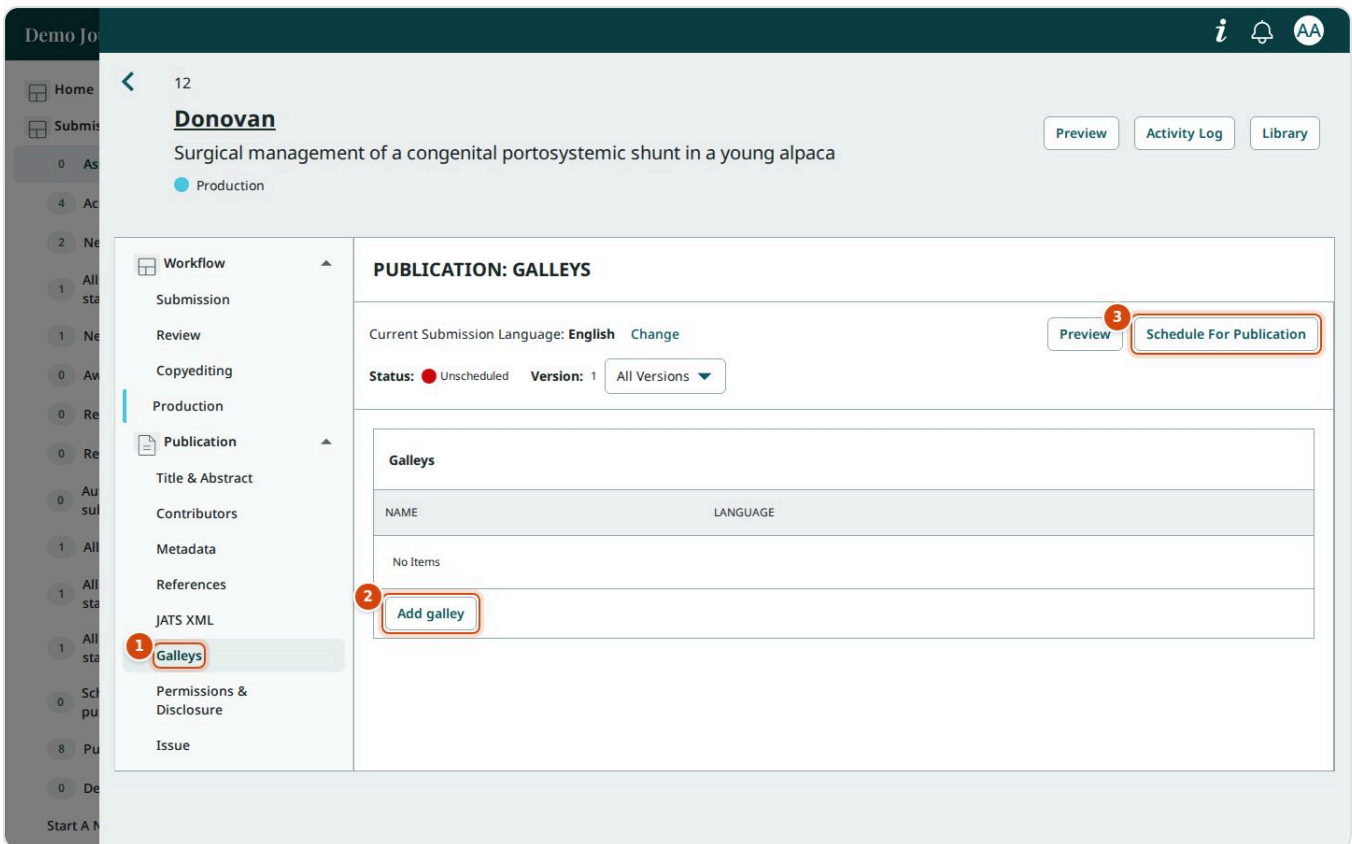

2 Margaret Ellison

1 **Send To Production** once the copyedited file is ready.

2 **Participants:** assign a copyeditor here, or upload the edited file yourself under **Copyedited Files**.

Production: galleys

A **galley** is a file readers see on the article page. Every article needs a PDF galley; an HTML galley is optional and shows the full text on the page, with clickable citations.

- 1 **Publication > Galleys** in the submission's menu.
 - 2 **Add galley**: label it **PDF** (or **Full Text** for HTML) and upload the file.
 - 3 **Schedule For Publication** places the article in an issue (chapter 7).
- 1 Use a text-based PDF (not a scan) with the title and authors on the first page. Google Scholar needs this.
 - 2 Before scheduling, check each part of **Publication**: Title & Abstract, Contributors (with ORCID iDs), Metadata (keywords), References, Permissions & Disclosure and Issue.
 - 3 Click **Schedule For Publication** and choose the issue.

References

The screenshot shows a web interface for managing a publication. On the left is a sidebar with a menu. The main content area is titled 'PUBLICATION: REFERENCES'. At the top of this area, it says 'Status: Published' and 'Version: 1'. Below this is a red warning bar that reads 'Warning: This version has been published. Editing it may impact the published content.' The 'References' section is highlighted in the sidebar and contains a list of references. A red box highlights the first two references, and a red circle with the number '2' is next to the first reference. A red circle with the number '1' is next to the 'References' link in the sidebar.

1 Publication > References

2 Paste the reference list, one reference per line. Include the DOI whenever there is one (for example <https://doi.org/10.1000/xyz123>).

References
Enter each reference on a new line so that they can be extracted and recorded separately.

Percie du Sert N, Hurst V, Ahluwalia A, Alam S, Avey MT, Baker M, et al. The ARRIVE guidelines 2.0: updated guidelines for reporting animal research. *PLoS Biol.* 2020;18(7):e3000410. <https://doi.org/10.1371/journal.pbio.3000410>

Festing MFW, Altman DG. Guidelines for the design and statistical analysis of experiments using laboratory animals. *ILAR J.* 2002;43(4):244–258. <https://doi.org/10.1093/ilar.43.4.244>

Schneider CA, Rasband WS, Eliceiri KW. NIH Image to ImageJ: 25 years of image analysis. *Nat Methods.* 2012;9(7):671–675.

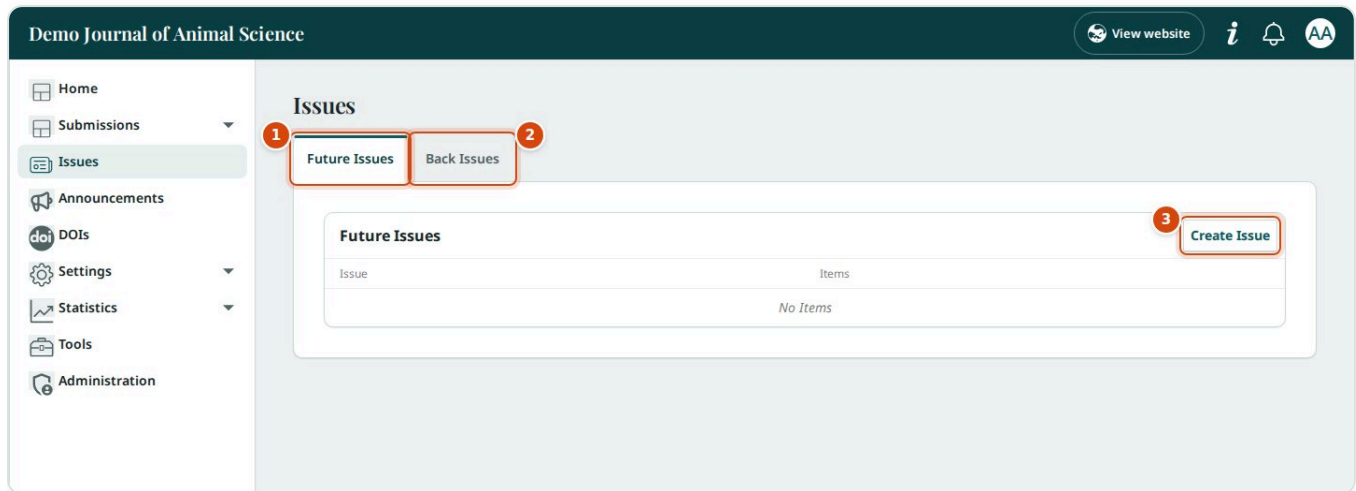

The website then numbers the references, links every DOI and web address, and adds Google Scholar and Crossref look-up links to each reference. Keywords become search links automatically.

HTML full text (optional)

To show the full text on the article page, add a galley labelled **Full Text** with an HTML file. Keep the HTML simple:

- Use level-2 and level-3 headings (1. *Introduction*, 2.1 *Animals*). They build the *On this page* menu automatically.
- Write citations as [1], [1, 2], [3–5] or (Smith et al., 2020). They become clickable automatically.
- Upload images as additional files of the same galley, with the same file names used in the HTML.
- From Microsoft Word: **File > Save as > Web Page, Filtered**, then delete the title, author list and abstract from the file, because the page already shows them.

Articles go live together when you publish their issue. Prepare the next issue in advance, schedule articles into it, then publish it with one click.

- 5 **Save.**

Publish an issue

- 1 Schedule each article into the issue from its Production stage (chapter 6).
- 2 Go to **Issues > Future Issues** and open the issue. Check the table of contents and the order of the articles.
- 3 Click **Publish Issue**. All its articles go online at once, DOIs are registered (if set up, chapter 11) and the issue becomes the **current issue** on the home page.

The screenshot shows the 'Demo Journal of Animal Science' website. The left sidebar contains navigation links: Home, Submissions, Issues (selected), Announcements, DOIs, Settings, Statistics, Tools, and Administration. The main content area is titled 'Issues' and has two tabs: 'Future Issues' and 'Back Issues' (selected). Below the tabs is a table titled 'Back Issues' with an 'Order' button. The table has three columns: 'Issue', 'Published', and 'Items'.

Issue	Published	Items
▶ Vol. 1 No. 2 (2026)	2026-06-15	4
▶ Vol. 1 No. 1 (2026)	2026-03-15	4

Back Issues: published issues. Open an issue to edit its details, add an issue PDF or unpublish it.

Correcting a published article

Open the article and click **Create New Version** in Publication. Make your changes and publish the new version; the website keeps the earlier version available for transparency.

08

CHAPTER 08 Authors and the author area

Authors have their own area in the admin panel, where they submit manuscripts, follow them and keep their public profile up to date. This chapter shows what they see, so you can guide them.

Registering and submitting

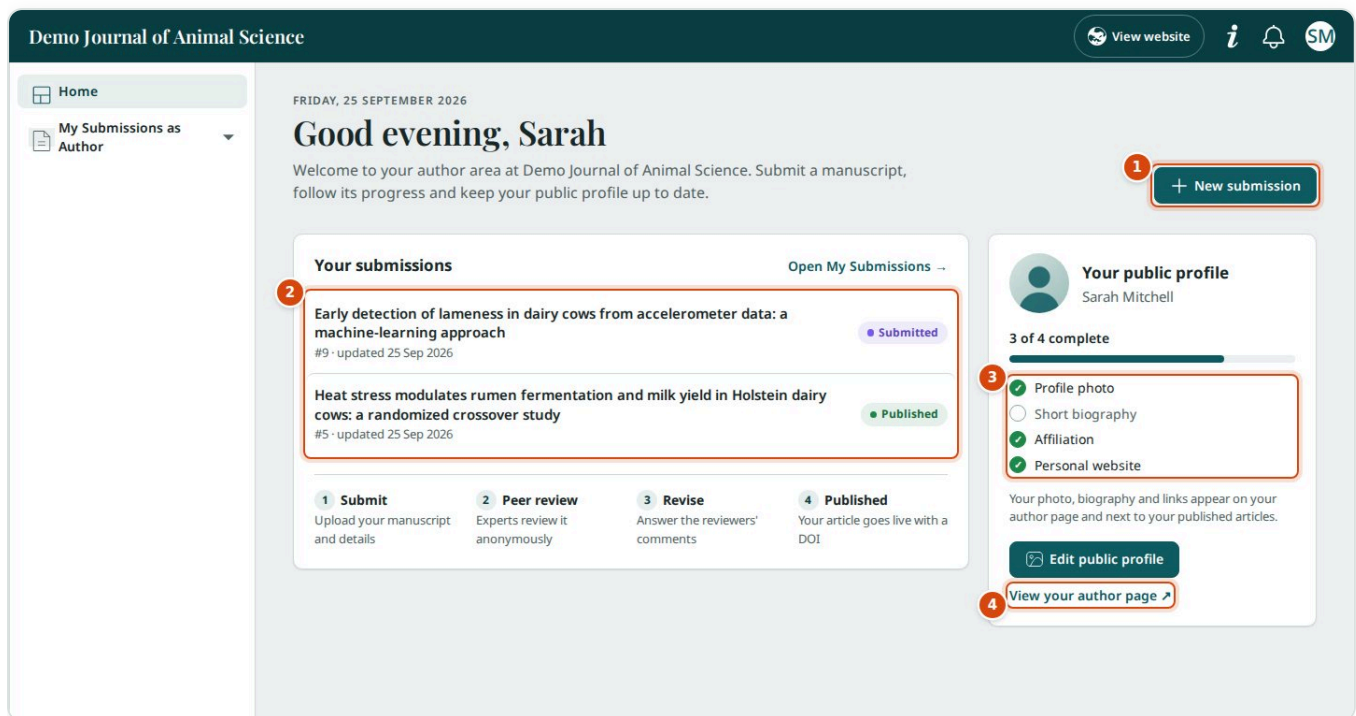

- 1 The author clicks **Register** on the website, fills in the form and confirms their email address.
- 2 They click **Submit Manuscript** on the home page (or **New submission** in their area).
- 3 They enter the title, choose a section and confirm the submission checklist, then go through **Details** (abstract, keywords, references), **Upload Files, Contributors, For the Editors** and **Review**, and submit.
- 4 They can save and finish later; unfinished submissions are kept as drafts.

The screenshot shows the 'Make a Submission' page in the 'Demo Journal of Animal Science' admin panel. The page has a dark blue header with the journal name and navigation links like 'View website', 'i', and 'SM'. A sidebar on the left contains 'Home' and 'My Submissions as Author'. The main content area is titled 'Make a Submission' and contains the following sections:

- Before you begin**: A paragraph explaining the submission process and a note to read the submission guidelines.
- Title ***: A text input field.
- Section ***: A section with the instruction 'Submissions must be made to one of the journal's sections.' and four radio button options: 'Original Research', 'Review Article', 'Short Communication', and 'Case Report'.
- Submission Checklist ***: A section with the instruction 'All submissions must meet the following requirements.' and a list of five requirements: 'This submission meets the requirements outlined in the Author Guidelines.', 'This submission has not been previously published, nor is it before another journal for consideration.', 'All references have been checked for accuracy and completeness.', 'All tables and figures have been numbered and labeled.', and 'Permission has been obtained to publish all photos, datasets and other material provided with this submission.' Below the list is a checkbox labeled 'Yes, my submission meets all of these requirements.'
- Privacy Consent ***: A checkbox at the bottom of the form.

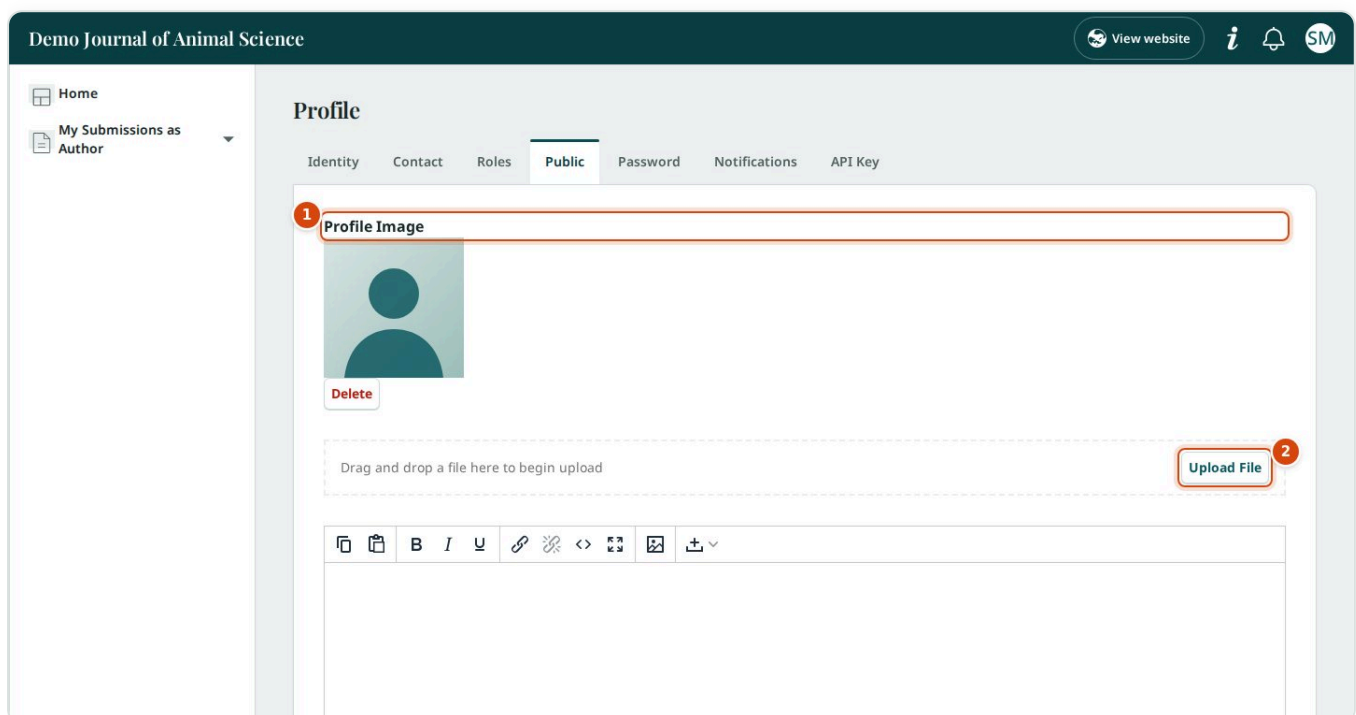

The first page of the submission form. The instructions and checklist come from your settings (chapter 10).

The author's Home page

- 1 New submission.
- 2 Their submissions with a plain status: Draft, Submitted, In review, Copyediting, Production, Scheduled, Published or Declined.
- 3 A checklist for their public profile: photo, biography, affiliation, ORCID iD and website.
- 4 A link to their public author page (once they have published).

Photo and biography

1 In **Profile > Public**, the profile image...

2 ...is uploaded with **Upload File** (a square photo of at least 150 × 150 pixels). The biography and website go below it.

How author pages are matched

An author's page collects all their published articles. Articles are matched by ORCID iD, or otherwise by email address. The photo and biography come from the author's account with the same email address. Ask authors to add their ORCID iD to every submission.

09

CHAPTER 09

Users, roles and the editorial team

Everyone who uses the admin panel has an account and one or more roles. You manage them in

Settings > Users & Roles

Invitations (0)

NAME	EMAIL	INVITATIONS	STATUS	AFFILIATION
No Items				

Current Users (9)

NAME	EMAIL	ROLES	START DATE	AFFILIATION
admin admin	admin@example.org	Journal manager		
Margaret Ellison	margaret.ellison@example.org	Journal editor	2026-01-01	Faculty of Veterinary Medicine, Northfield University
James O'Connor	james.oconnor@example.org	Section editor	2026-01-01	School of Agriculture and Food Science, Eastbrook College
Alice Thompson	alice.thompson@example.org	Section editor	2026-01-01	Department of Surgery, Riverside Veterinary School
Lucas Fletcher	lucas.fletcher@example.org	Editorial Board Member	2026-01-01	Department of Animal Nutrition, Southgate University
Amelia Dawson	amelia.dawson@example.org	Editorial Board Member	2026-01-01	Institute of Livestock Research, Westfield University
Henry Marshall	henry.marshall@example.org	Editorial Board Member	2026-01-01	Institute of Animal Welfare, Eastbrook College
Philippa Nash	philippa.nash@example.org	Editorial Board Member	2026-01-01	Department of Veterinary Microbiology, Northfield University
Sarah Mitchell	sarah.mitchell@example.org	Author		Department of Animal Science, Northfield University

- 1 Invite to a role:** enter a person's email address and choose a role (for example Section editor or Reviewer). They receive an invitation to accept.
- 2** Search users by name, email or role.
- 3** Each user with their roles, start date and affiliation.
- 4** The ... menu: edit the user's details and roles, or email them.

Roles

Users & Roles

Users Roles Site Access Options ORCID

Current Roles [Search](#) [Create New Role](#)

Role Name	Permission level	Submission	Review	Copyediting	Production
▶ Journal manager	Journal Manager	☐	☐	☐	☐
▶ Journal editor	Journal Manager	☒	☒	☒	☒
▶ Production editor	Journal Manager	☐	☐	☒	☒
▶ Section editor	Section Editor	☒	☒	☒	☒
▶ Guest editor	Section Editor	☒	☒	☒	☒
▶ Copyeditor	Assistant	☐	☐	☒	☐
▶ Designer	Assistant	☐	☐	☐	☒
▶ Funding coordinator	Assistant	☒	☒	☐	☐
▶ Indexer	Assistant	☐	☐	☐	☒
▶ Layout Editor	Assistant	☐	☐	☐	☒
▶ Marketing and sales coordinator	Assistant	☐	☐	☒	☐
▶ Proofreader	Assistant	☐	☐	☐	☒
▶ Author	Author	☒	☒	☒	☒
▶ Translator	Author	☒	☒	☒	☒

The **Roles** tab lists each role, its permission level and the stages it can access. The default roles suit most journals.

The editorial team page

The **Editorial Team** page on the website lists people in the editorial roles (Journal editor, Section editor, Editorial Board Member), with their affiliation. To keep it up to date:

- 1 Give each board member an account with the right role (invite them, as above).
- 2 Make sure their profile has their affiliation and, ideally, their ORCID iD.
- 3 Set the order of the roles on the page in **Settings > Website > Appearance > Editorial Masthead**.

10

CHAPTER 10 Website settings

You can change the look and content of the website yourself. Most settings are under **Settings › Website** and **Settings › Journal**. Click **Save** after each change.

Theme options

Settings › Website › Appearance › Theme, below the theme choice:

1 Accent colour
Used for links, focus outlines and active states. Colours that are too light to read on white (contrast below 4.5:1) are ignored.

2 Home page sections
Choose which sections appear on the journal home page.

- ☒ Current issue
- ☒ Latest articles
- ☒ Aims & Scope (journal summary)
- ☒ Announcements
- ☒ Indexing logos

3 Tagline
A short line shown under the journal name on the home page.

Peer-reviewed · Open access · Animal

4 Indexing and membership logos
One per line, in the form: Name | Logo image URL | Link URL. The logo and link are optional.

Google Scholar | | <https://scholar.google.com>
Crossref | | <https://www.crossref.org>
ORCID | | <https://orcid.org>
DOAJ (in preparation) | | <https://doaj.org>
PKP Preservation Network | | <https://pkp.sfu.ca/pkp-pn/>

5 Save

1 Accent colour for links, buttons and highlights.
The admin panel uses it too.

2 Home page sections to show or hide.

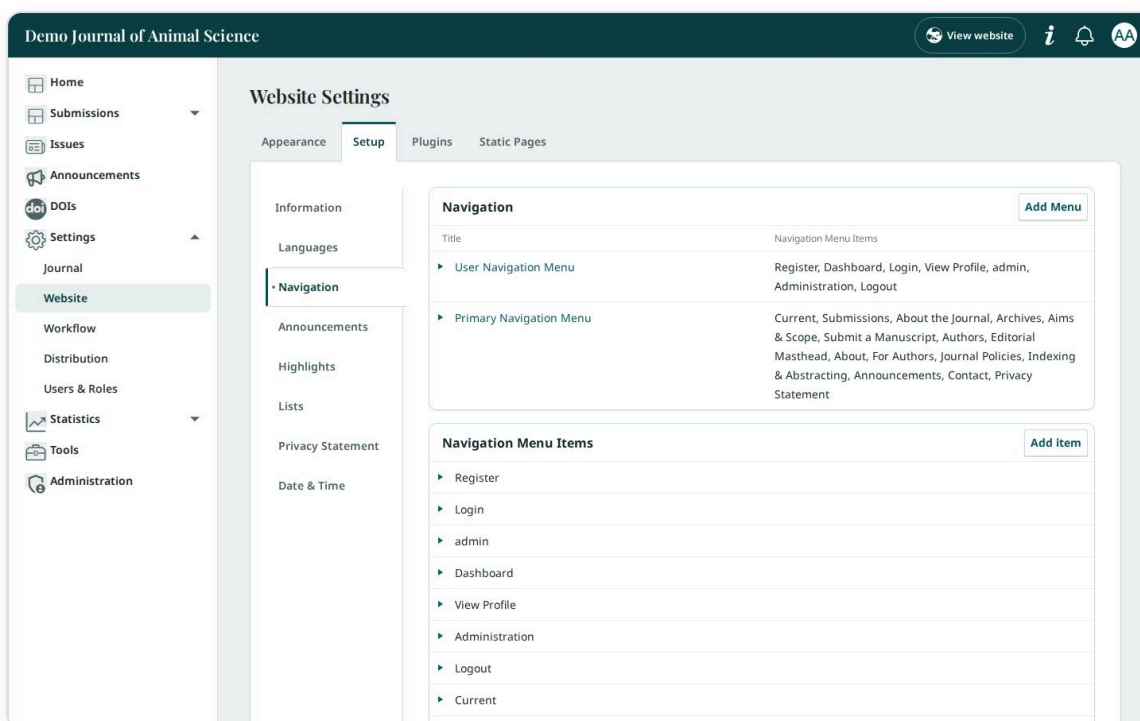

3 Tagline under the journal name on the home page.

4 Indexing logos, one per line: *Name | logo address | link*.

5 Save.

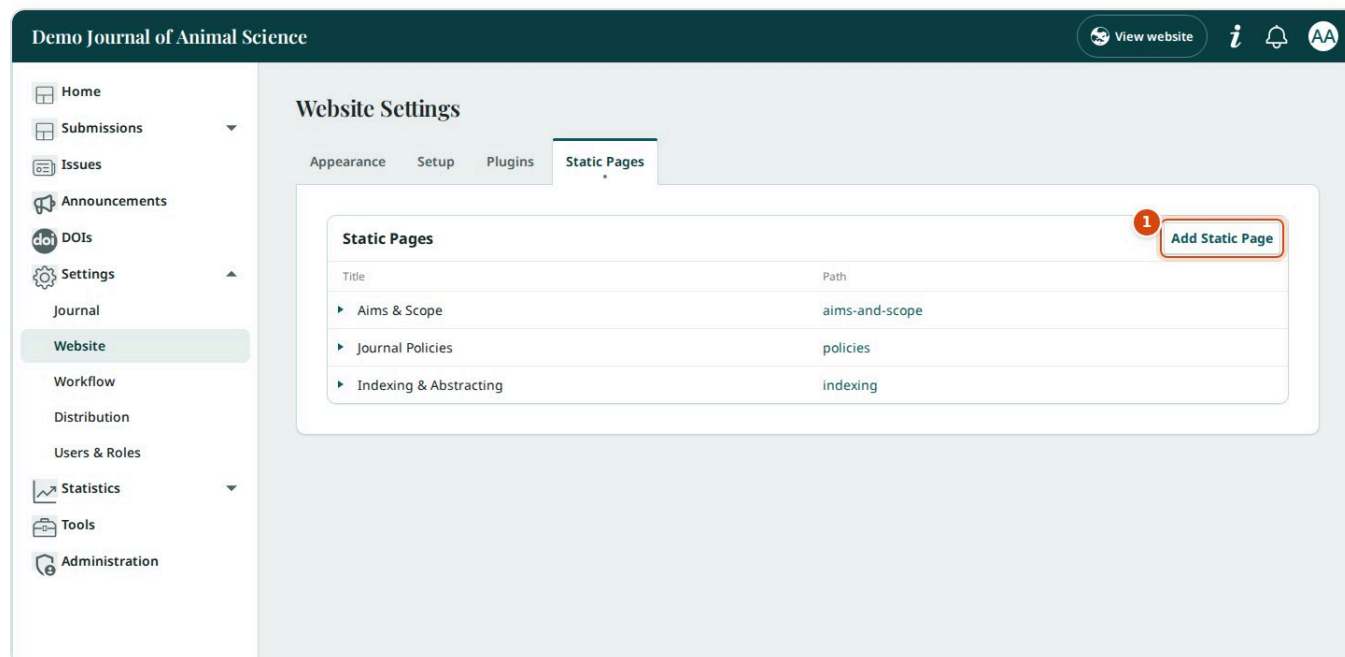

The logo, favicon and footer text are in **Settings › Website › Appearance › Setup**.

Menus

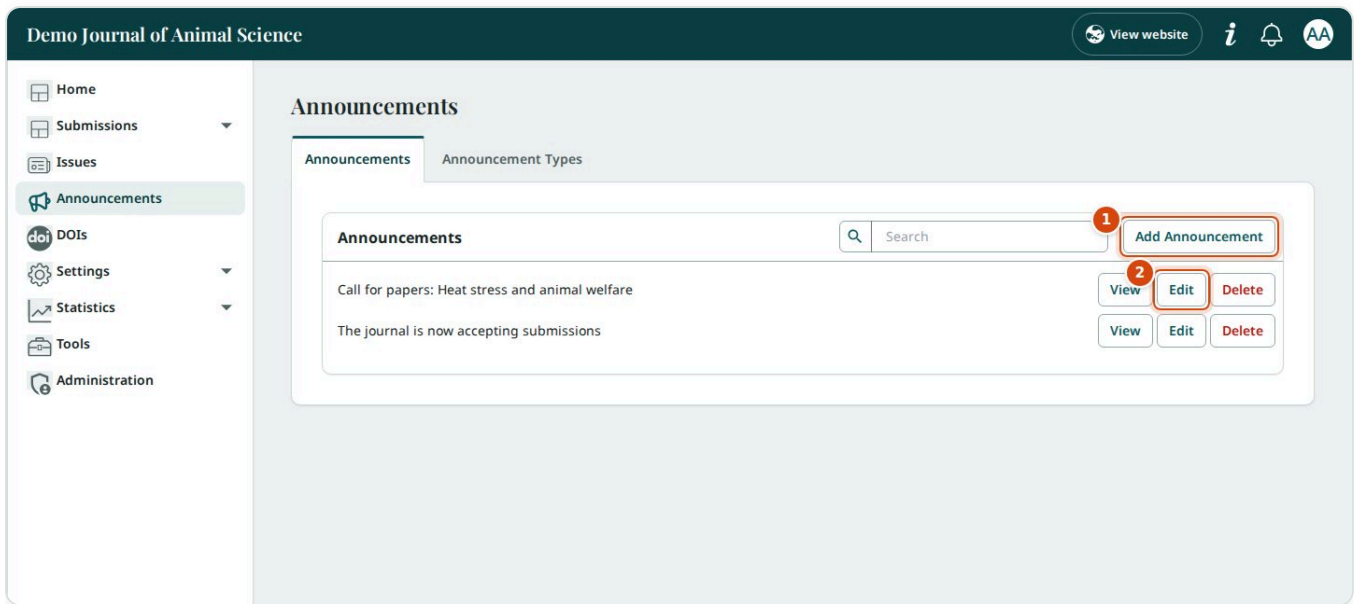

Settings > Website > Setup > Navigation . Open **Primary Navigation Menu** to add, remove or reorder the items in the website's main menu; drag items to nest them under About or For Authors.

Pages such as Aims & Scope or Journal Policies

1 **Settings > Website > Static Pages** : **Add Static Page** creates a page with its own address (for example */policies*). Add it to a menu to link it.

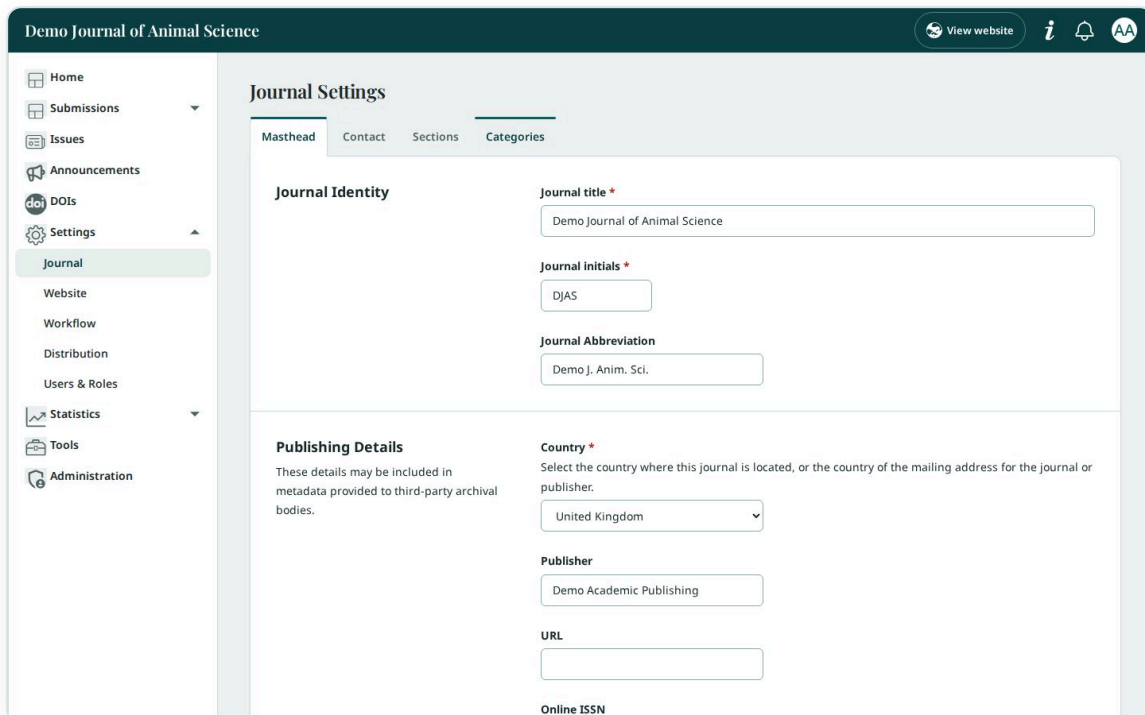

Announcements

1 **Add Announcement:** news such as a call for papers. The latest ones appear on the home page.

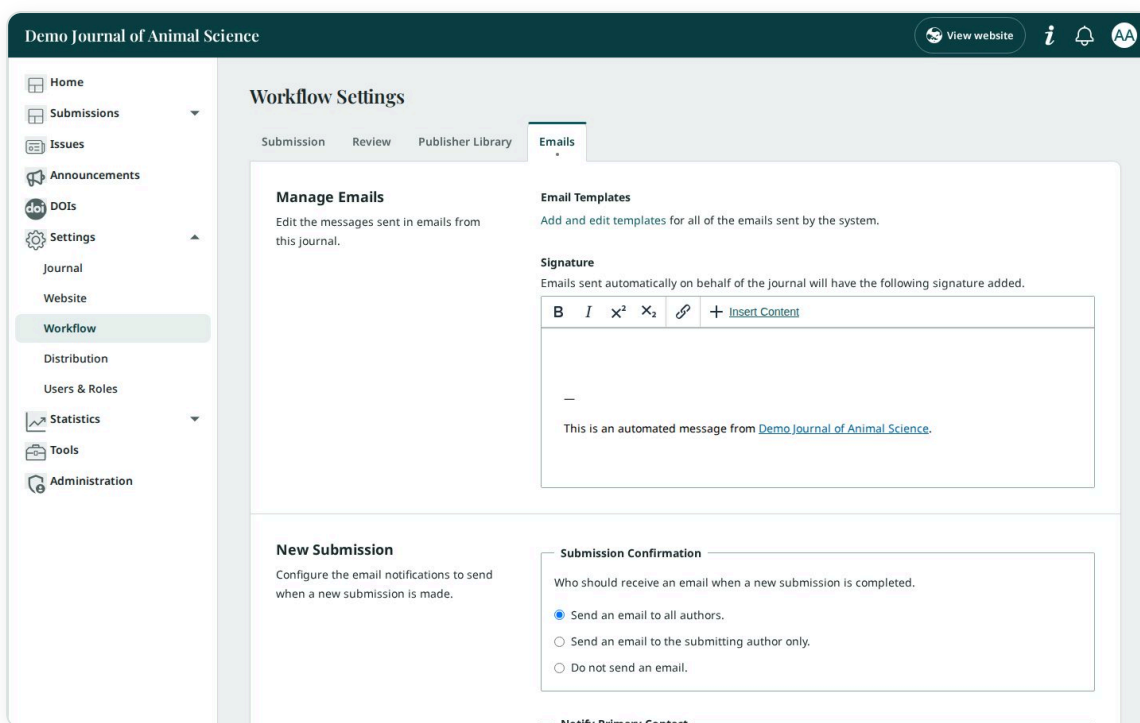

2 Edit or delete existing announcements.

Journal information

Settings › Journal : journal name, abbreviation, ISSN, publisher, the *About the Journal* text (Masthead), contact details (Contact) and the journal's sections (Sections).

Emails and author guidelines

Settings › Workflow › Emails : the signature on every email and the text of each automatic email (**Manage Emails**).

TO CHANGE...	GO TO
Author guidelines and the submission checklist	Settings › Workflow › Submission
Review deadlines, reminders and review forms	Settings › Workflow › Review
Licence and copyright	Settings › Distribution › License
Privacy statement	Settings › Website › Setup › Privacy Statement
Date format	Settings › Website › Setup › Date & Time

11

CHAPTER 11 DOIs, statistics and readership

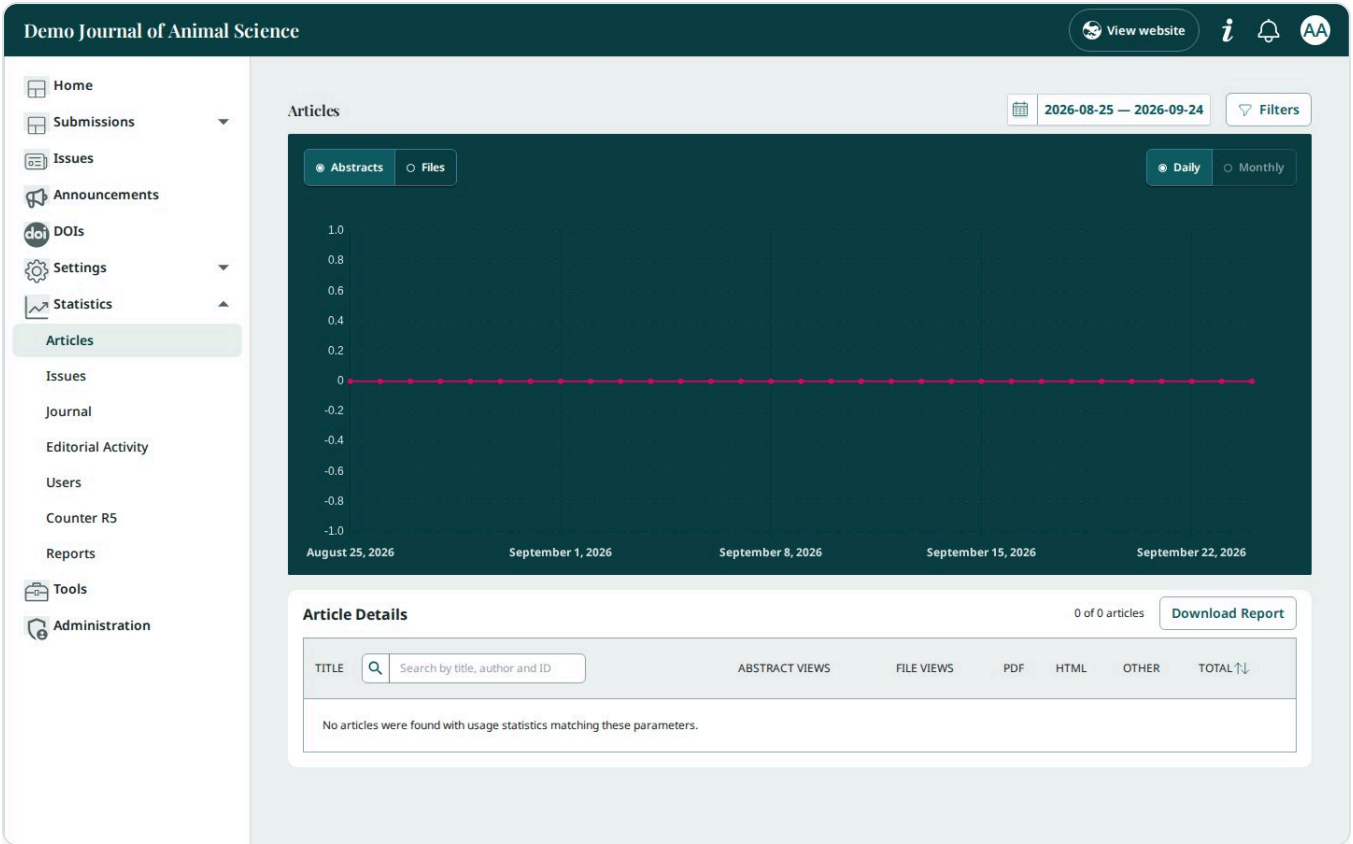

A DOI is a permanent link to an article, required by most indexing services. Statistics show how often your articles are read and downloaded, from which countries, and who is on the site right now.

DOIs

The **DOIs** page (left menu) lists every article and issue with its DOI and registration status. From here you can assign, register or update DOIs in bulk.

- 1 Become a member of Crossref (crossref.org) to receive your DOI prefix and login.
- 2 Enter the prefix in **Settings › Distribution › DOIs**. DOIs are then assigned automatically when articles are published.
- 3 Enter your Crossref login under **Registration** on the same tab, so DOIs and reference lists are registered automatically.

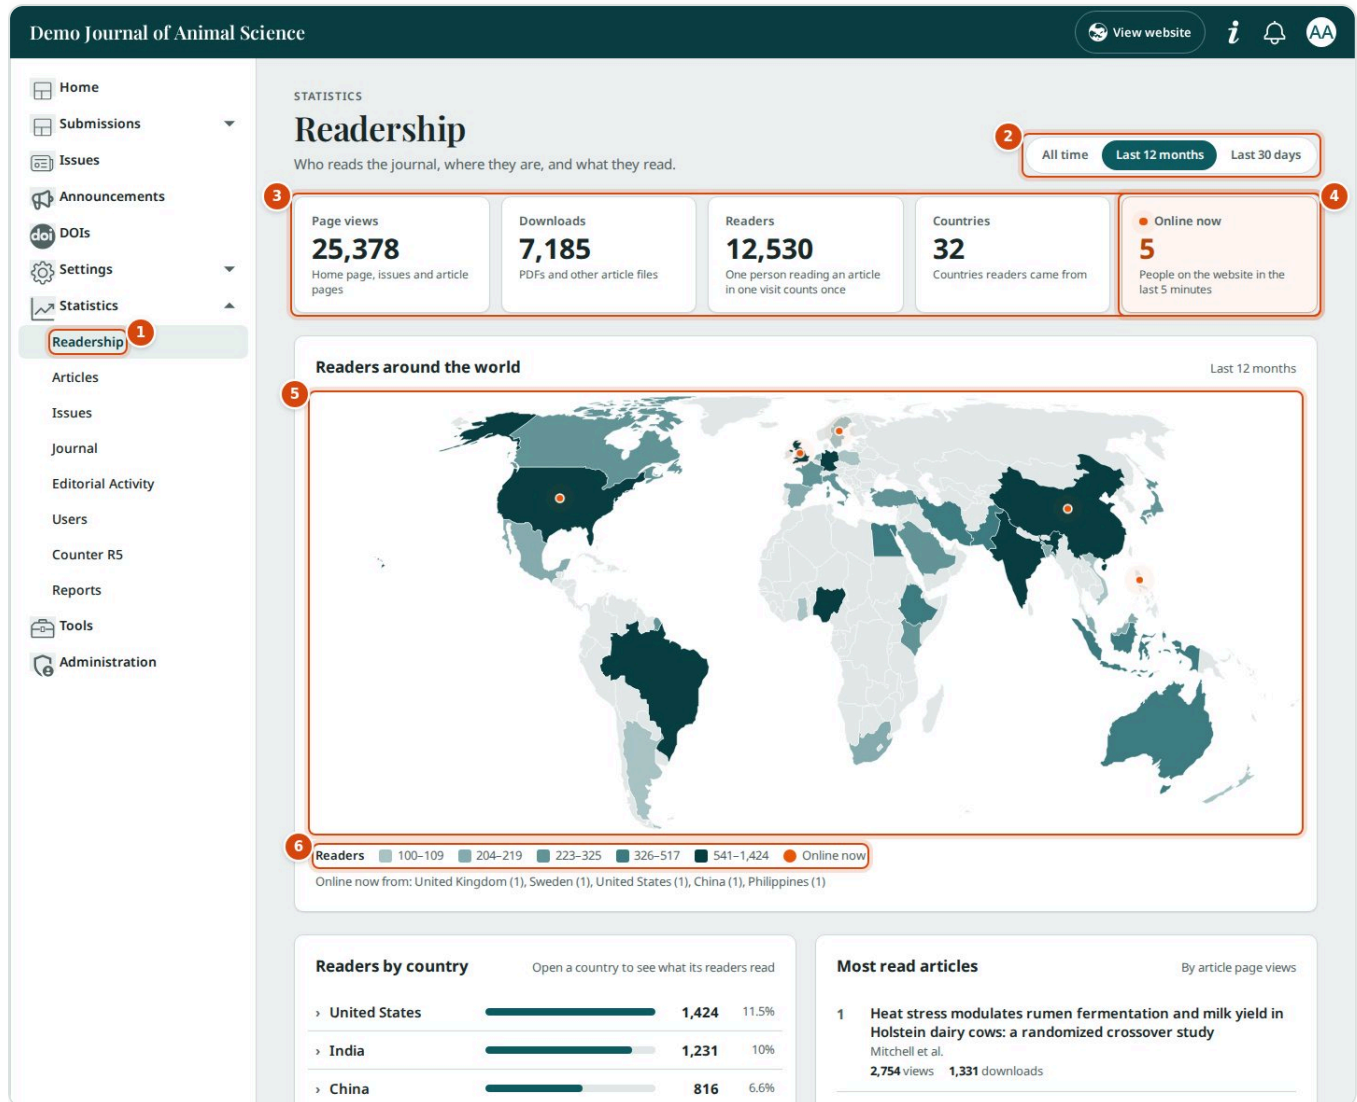

Statistics

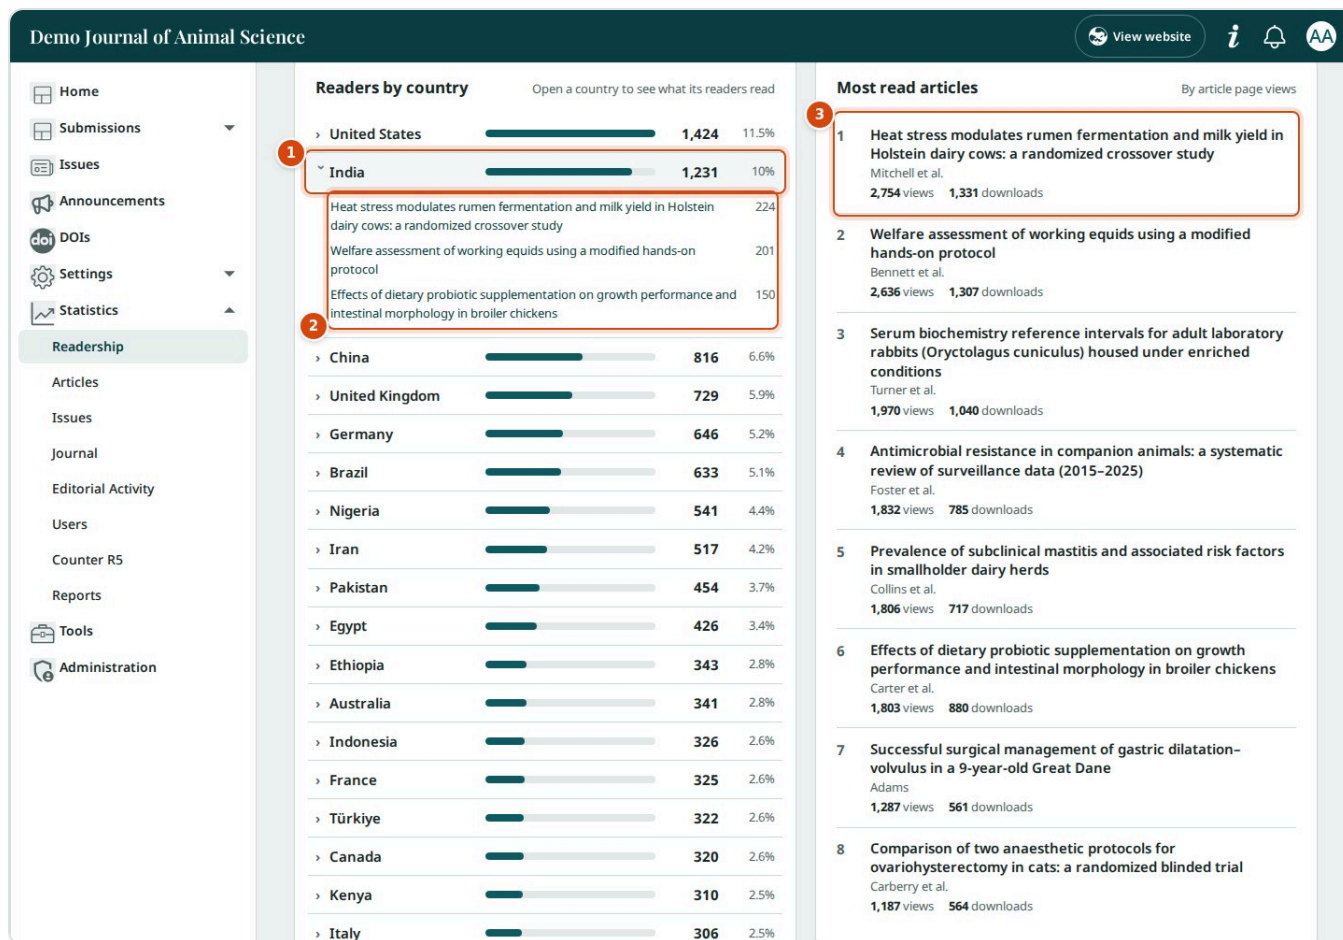

Statistics > Articles : abstract views and file downloads over time, per article, with filters and a downloadable report. **Editorial Activity** shows submission numbers, acceptance rates and review times.

Readership: countries, articles and visitors online

Statistics > Readership (also a shortcut on Home) puts the most useful numbers on one page.

- 1 Readership** in the Statistics menu.
- The period: all time, the last 12 months or the last 30 days.
- 3 Page views** (home page, issues and articles), **downloads** (PDFs and other files), **readers** (one person reading an article in one visit counts once) and **countries**.
- 4 Online now:** people on the website in the last 5 minutes. It refreshes every minute.
- The **world map**. The darker the country, the more readers it has. Point at a country to see its number. Orange dots show where people are online now.
- What each shade means.

- 1 **Readers by country**, with each country's share. Click a country to open it.
- 2 The articles that country's readers read most.
- 3 **Most read articles**, with their views and downloads. Further down, a chart of the last 12 months and the views of each kind of page.

When the numbers update

OJS counts visits once a day, overnight, so views, downloads and countries run up to yesterday. **Online now** is live. Search engines and other bots are never counted. Countries come from the visitor's internet address, which is not stored.

Readers around the world on your home page

- 1 The world map of your readers, with orange dots for people online now.
- 2 How many readers are on the site right now.
- 3 Articles published, page views, downloads and countries, since the start.
- 4 The five countries with the most readers.

Visitors see the same map near the bottom of your home page. To show or hide it, tick or untick **Readers around the world** in **Settings > Website > Appearance > Theme > Home page sections** and click **Save**.

Google Analytics for more detail (optional)

For even more detail in real time (visitors' cities, which pages are being read at this moment, and where visitors came from), connect Google Analytics. It is free.

- 1 At analytics.google.com, create an account and a **GA4 property** for <https://raazpublishnp.com>, with a **Web** data stream.
- 2 Copy the stream's **Measurement ID**; it starts with **G-**.
- 3 In the admin panel, open **Settings > Website > Plugins**, find **Google Analytics**, click the arrow next to it and choose **Settings**.
- 4 Paste the Measurement ID into the field (1) and click **OK**.
- 5 In Google Analytics, **Reports > Realtime** now shows visitors as they arrive. The other reports fill up within a day.

Readership, Google Analytics or Search Console?

Readership is built in and counts every reader, with no extra setup. **Google Analytics** adds real-time detail and uses cookies, so if many readers are in Europe, add a short cookie notice. **Google Search Console** is different again: it shows how your articles appear in Google search results and which searches lead to them, but not who reads them.

12

CHAPTER 12

Your password and account

Your login is on the cover of this guide. You can change the password whenever you like; we recommend doing so after your first sign-in and keeping it in a password manager.

Change your password

- 1 Click your initials at the top right of the admin panel and choose **Edit Profile**.
- 2 Open the **Password** tab.
- 3 Enter your current password, then the new password twice, and click **Save**.

The screenshot shows the 'Demo Journal of Animal Science' admin panel. The top navigation bar includes 'View website', 'i', a bell icon, and 'AA'. The left sidebar lists 'Home', 'Submissions', 'Issues', 'Announcements', 'DOIs', 'Settings', 'Statistics', 'Tools', and 'Administration'. The main content area is titled 'Profile' and has tabs for 'Identity', 'Contact', 'Roles', 'Public', 'Password', 'Notifications', and 'API Key'. The 'Password' tab is active, showing a form with the following elements:

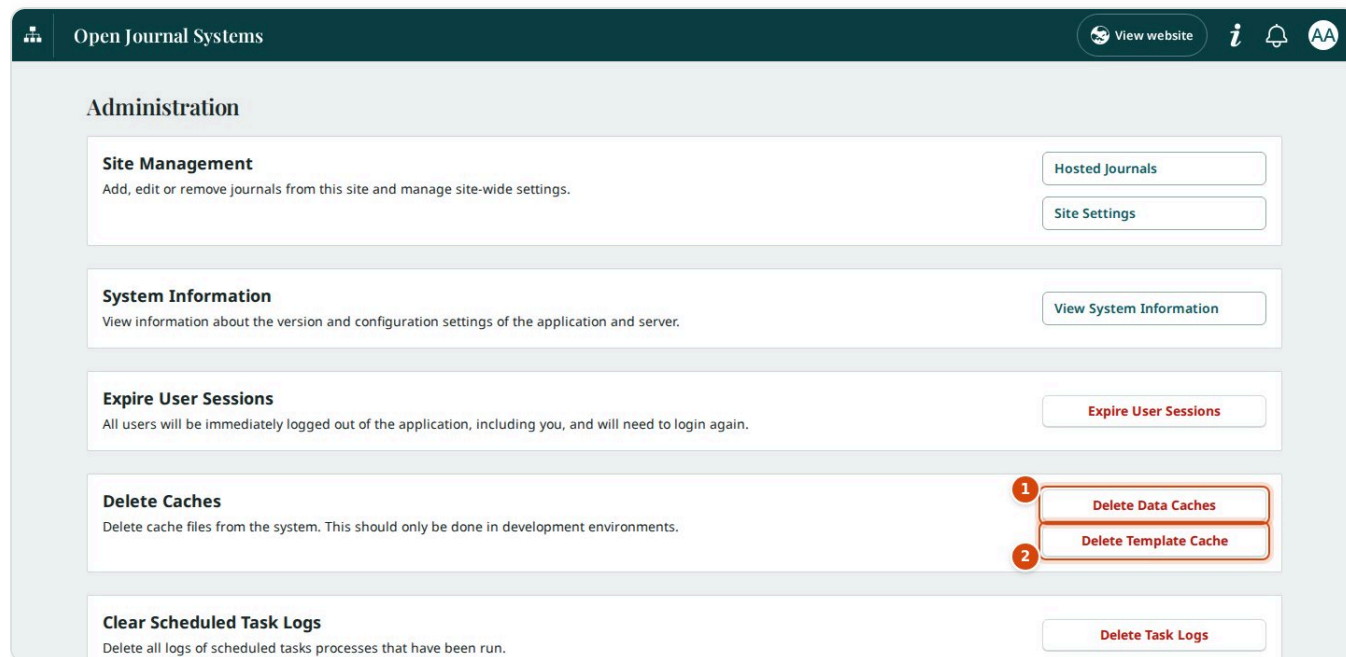

- A heading: 'Enter your current and new passwords below to change the password for your account.'
- Field 1: 'Current password' (indicated by a red circle with '1').
- Field 2: 'New password' (indicated by a red circle with '2').
- Field 3: 'Repeat new password' (indicated by a red circle with '3'). A note below this field states: 'The password must be at least 6 characters.'
- Field 4: 'Save' button (indicated by a red circle with '4'). A 'Cancel' button is also present.
- A footer note: 'Your data is stored in accordance with our [privacy statement](#).'

- 1 Current password.
- 2 New password (at least 6 characters; longer is safer).
- 3 Repeat the new password.
- 4 **Save**.

The same profile has your name, email address, affiliation and notification preferences. If you forget your password, use **Forgot your password?** on the login page; a reset link is sent to your email address.

If a change doesn't appear on the website

The website keeps copies of pages to stay fast. If a change to the settings doesn't show, clear them:

1 Administration › Delete Data Caches.

2 Delete Template Cache. Then reload the website page.

Keep your account safe

Use the administrator account for administration only. For day-to-day editorial work, invite each editor with their own account (chapter 9), so everyone signs in with their own name and the activity log shows who did what.

13

CHAPTER 13

Quick reference

Where do I...?

TASK	WHERE
See what needs my attention	Home
Find a submission	Submissions (lists, search and filters)
Assign an editor or reviewer	Open the submission › Assign / Add Reviewer
Accept, request revisions or decline	Open the submission › decision buttons on the right
Upload the final PDF	Open the submission › Publication › Galleys
Add or fix references	Open the submission › Publication › References
Create or publish an issue	Issues
Post news	Announcements
Change colours, home page sections, tagline	Settings › Website › Appearance › Theme
Change the logo or footer	Settings › Website › Appearance › Setup
Edit the main menu	Settings › Website › Setup › Navigation
Add a page (policies, aims & scope...)	Settings › Website › Static Pages
Edit journal name, ISSN, contact	Settings › Journal
Edit author guidelines	Settings › Workflow › Submission
Edit automatic emails	Settings › Workflow › Emails
Invite editors and reviewers	Settings › Users & Roles
DOIs and Crossref	DOIs and Settings › Distribution › DOIs
Readers by country, most read articles, online now	Statistics › Readership
Detailed article statistics and reports	Statistics › Articles / Reports
Invite a reviewer suggested by another reviewer	Open the submission › Add Reviewer › Reviewer Suggestions
Connect Google Analytics	Settings › Website › Plugins › Google Analytics › Settings
Change my password	Your initials › Edit Profile › Password

Common questions

Can authors publish their own articles?

No. Authors submit; editors publish after peer review. This is what makes the journal peer-reviewed, and indexing services such as DOAJ and Scopus require it. For sections without review, such as editorials, use **Accept and Skip Review**.

A change I made doesn't show on the website.

Clear the caches (chapter 12) and reload the page.

An author's photo doesn't appear on their author page.

The photo comes from the author's own account (**Profile › Public**). The email address in the account must match the one on the article, or the article must have the author's ORCID iD.

Why does the map show few countries, or none?

Countries are counted from the day the website went live, and figures appear the day after the first visits. A new journal starts with few readers; the map fills in as your articles are found and shared.

A reviewer didn't receive the invitation.

Ask them to check their spam folder. In the Reviewers panel of the submission you can resend the request or email the reviewer directly.

How do I correct a published article?

Open it, click **Create New Version** in Publication, make the change and publish the new version (chapter 7).

How do I remove the sample content?

The sample articles and people shown in this guide are only for illustration. Your website contains your own journal; add your issues and articles as described in chapters 4 to 7.

Will the journal be indexed in Scopus, Web of Science or DOAJ?

The website meets the technical requirements of these services (metadata, DOIs, open licences, OAI-PMH). Acceptance is decided by each service, based mainly on the journal's content, publishing regularity and history. DOAJ usually expects about a year of publishing, and Scopus about two years.
